

F&S Elektronik Systeme GmbH is a manufacturer of electronic boards and modules. We are therefore considered a “downstream user” as far as the REACH document is concerned and are therefore not obliged to register with the European Agency for Chemicals (ECHA) and don't need to provide safety data sheets.

The products that we supply are non-chemical and under normal and reasonable use, they will not release any harmful substance. According to REACH regulation (EU) 1907/2006 Art. 33 we will continue to monitor the REACH regulation and will inform you immediately if ingredients of our products (with percentage of >0,1%) are classified as unsafe. From our current point of view we do not anticipate this to ever happen.

In our own interest and to guarantee the best safety of our customers, we are intensely watching and also encouraging the implementation of REACH on the side of our suppliers. We are in close contact with our suppliers of chemical substances and other preparation steps (e.g. raw materials, auxiliaries and operating supplies for the manufacturing, processing and assembling of our products and all other in-house processes) and we will add the pre-registering and later registering of the relevant substances in REACH as a pre-requisite in our supplier qualification.

Dipl.-Ing (FH) Holger Frölich
