

The F&S Elektronik Systeme GmbH is a manufacturer of electronic (computer) modules, intended for the integration into our customers' devices.

The European Union (EU) has issued various regulations relating to the restriction of hazardous substances and F&S takes commercially reasonable steps to fulfil its obligations in this regard. In our own interest and to ensure the best possible safety for our customers, we also intensively monitor and promote the implementation of the relevant regulations on the part of our suppliers as a pre-requisite for the supplier qualification.

## RoHS

The **Directive 2011/65/EU** on the restriction of the use of certain hazardous substances in electrical and electronic equipment (RoHS) replaces the former **Directive 2002/95/EG**.

As a result of our investigations and according to our current knowledge, all F&S products are compliant with the **Directive 2011/65/EU** and its extensions (e. g. **Commission Delegated Directive 2015/863/EU**).

The EUR-Lex website provides access to the latest consolidated version of

- [Directive 2011/65/EU](#)

with the list of the restricted substances (Annex II).

## REACH

In accordance with Article 7 of **Regulation (EC) No. 1907/2006** concerning the Registration, Evaluation, Authorization and Restriction of Chemicals (REACH), F&S is not obliged to register substances with the European Chemicals Agency (ECHA) and does not provide safety data sheets.

The products and packaging materials supplied by F&S do not release harmful substances under normal and reasonable use. However, F&S is aware that they are or may be subject to the obligations arising from Article 33, 56 and 67 of the REACH Regulation.

**Note:** *Please understand that F&S does not carry out any material tests or chemical analyses.*

As a result of our investigations and according to our current knowledge, our products do not contain Substances of Very High Concern (SVHC) in a concentration > 0.1 % weight by weight (w/w) and are compliant with Annex XIV and XVII of the REACH Regulation.

The ECHA website provides the latest versions of the

- [Candidate List of SVHC](#)
- [Annex XIV \(Authorisation List\)](#)
- [Annex XVII \(Substances restricted under REACH\)](#)

## POPs

Persistent organic pollutants (POPs) remain in the environment after their release. They accumulate through the food chains and pose a risk to human health and the environment. POPs are regulated worldwide by international treaties such as the Stockholm Convention. **Regulation (EU) No. 2019/1021** (POPs Regulation) implements the obligations of the EU and replaces **Regulation (EC) No. 850/2004**.

As a result of our investigations and according to our current knowledge, our products are compliant with the **Regulation (EU) No. 2019/1021** and do not intentionally (according to article 4 point (b) of paragraph 1) contain substances listed in Annex I & II.

The ECHA website provides the latest version of the
